

CMF presents new financial market statistical series

- New data includes solvency indices of banks and payment card issuers.
- The information is available on the Commission's [BEST platform](#).

August 5, 2025 – The Financial Market Commission (CMF) makes available to citizens a new set of statistical information for the banking sector and payment card issuers. The data is available on the [Temporary Series Statistical Database](#) (BEST, for its Spanish acronym) platform through the menu located on the left side of the screen.

For example, it is now possible to review [liquidity](#) and [solvency](#) indices of the banking system, as well as data on [banking leasing](#) operations. The new data also features [activity](#), [risk](#), and [performance](#) figures for payment card issuers disaggregated by entity.

The Commission invites interested parties to check all data available on the BEST platform. This [tutorial video](#) is also available to help you learn how to use BEST with examples of data searches, graph reviews, and table downloads.
